Measurement guide

Take these six measurements over a blouse that already fits you well, not over loose clothing. Keep the tape level and snug, never pulled tight. Send them to us on WhatsApp along with a photograph of the design you have in mind.

- | | | |
|----|----------------------|---|
| 01 | Bust | Around the fullest part, tape level all the way round, not pulled tight. |
| 02 | Waist | Around the narrowest part of your waist, where you would tie a saree. |
| 03 | Shoulder | Across the back, from the tip of one shoulder to the tip of the other. |
| 04 | Sleeve length | From the shoulder tip down the arm to where you want the sleeve to end. |
| 05 | Blouse length | From the shoulder at the neck, straight down the front, to where the blouse should end. |
| 06 | Armhole | Around the arm at the underarm, over the shoulder and back again. |

Not sure about a measurement? Send us a blouse that fits you well and we will take everything from it.
